## THE WHITEHAVEN BOOK OF PRICES (1810)

The Prices Agreed to Between The Masters and Journeymen Cabinet Makers in Whitehaven (1810), printed by T. Wilson, 12 pp. is reprinted here for the first time in its entirety. The twelve pages are packed with an extraordinary variety of local furniture types. The use of birch is notable, as is the specification for three distinctive patterns for fashionable mahogany chairs. Fieldwork to find examples of these chairs would be a most useful project.
