

Painted Lancashire (?) Child's Chair

An RFS member, Mike Hicks, sent these accompanying pictures to us. In over 30 years of dealing he has never seen anything similar. He acquired it from a private collector but there was no provenance for the chair. The painting certainly looks early 19th century, as does the chair itself. From the very distinctive fan top rail it would be reasonable to suppose that the chair is from the Liverpool/Chester area.

If any members have seen or heard of similar chairs it would be good to know and any responses will be included in the next newsletter.
