

## REQUEST- A SCOTTISH TRADITION?

In the course of my doctoral research on the Wrights Incorporation of Perth and Perth Furniture 1700-1840, I have located a few interesting cupboards and presses, the design of which I have never seen before. The basic

form and manner of construction of these cupboards are not extraordinary except the conjunction of deeply inset and fielded panels and the slim, inset grooves acting like pilasters on either side of drawers, glazed or panelled doors. I would be very interested in knowing if any other RFS members have seen anything like it.

*The oak glazed cupboard measures in inches:- 41W top 45H top, 11.5D top. 41W bottom, 40H bottom, 17D rail, 16D bottom.*
